TAKE CHARGE OF SIGHT

Hope Vision Foundation is a non-profit organization that empowers patients with low vision or vision loss. By providing vision care with a commitment to comprehensive rehabilitation, Hope Vision Foundation supports patients with the tools and resources they need to regain their independence, maximize their vision and improve their quality of life.

The Washington South Sound area, including Pierce and Thurston counties, lacks ophthalmic, optometric and occupational therapy resources for the over 40,000 people suffering from low vision. Low vision patients may not seek out resources if not completely blind or may have difficulty understanding how to access resources.

Hope Vision Foundation is here to help by providing individualized, comprehensive vision care and services for low vision patients throughout Washington.

Continuum of Eye Care

As our eye sight changes, so does the care we seek. Where do you fall on the eye care continuum?
